with side-guiding

Fittings & other parts

Universal bracket

Side-guiding bracket Type 1
Floor/window sill fitting

Type 2
Wall fitting, non-adjustable

Type 3
Wall fitting, adjustable

Hold down magnet

Measurements & mounting

All measurements in mm

Stacking height

Slat	Ladders	Blind height in mm				
		1000	1500	2000	2500	3000
50mm	2mm	150	180	210	240	270
	13, 24mm	170	215	260	305	350

Please note that we strongly recommend a max. height of 2600mm.

Mounting on a wall or ceiling

Measure the distance from the ceiling, or from a point on the wall, down to the point where you want the product to end. This measurement is your system height.

Measure the width between two points on the wall or ceiling. This measurement is the system width. If the product is fitted from wall to wall, we recommend that you subtract 10mm from this measurement.

Recess mounting

Measure the width inside the window recess and subtract 10mm from this measurement. This is your system width. We recommend that the measured height inside the recess is identical to the system height.
